STATISTICAL RESULTS OF COOPERATIVE EXTENSION WORK, 1924

Introduction

A slightly different plan has been followed in compiling the statistical results of cooperative extension work in 1924 from that used in previous years. The State extension services were invited to tabulate the annual county reports in the State offices and to send to the national extension office complete State summaries for each kind of county extension work. Thirty-two States accepted responsibility for summarizing the county reports but for the remaining 16 States, the county reports were tabulated in the national extension office as heretofore.

Extension work in 1924 was carried on by 3,446 county extension agents assisted by the equivalent of 765 full-time subject-matter specialists. This is an increase of 34 county extension agents and 65 specialists over 1923. (Table 1.) The statistical information contained in this report is based on the annual reports of 3,419 county extension agents who reported on all extension work done in their respective counties, supplemented by reports of State supervisors, covering work in counties without extension agents.

Table 1. - Number of County Extension Agents Employed and Number Reporting

Kind of extension agent	Number employed June 30, 1924	Number of reports included in 1924 summary
County agricultural agents.....	2,174	2,137
Negro agents (men).....	<u>166</u>	<u>162</u>
Total number agricultural agents.....	2,340	2,299
County home demonstration agents.....	863	889
Negro agents (women).....	<u>101</u>	<u>107</u>
Total number county home demonstra- tion agents.....	964	996*
County club agents.....	140	123
Negro agents (club).....	<u>2</u>	<u>1</u>
Total number county club agents.....	142	124
Total number of all agents.....	3,446	3,419

*The larger number of home demonstration agents reporting than employed June 30, 1924, is due to the fact that reports were received from a number of home demonstration agents whose services were discontinued prior to June 30 or whose employment did not begin until after the middle of the year.

National Program of Work

The relative amount of time county extension agents and specialists devoted to the various subject-matter lines of work gives one a fairly good picture of the national program of extension work. (Table 2.)

Table 2. - Percentage of Agents' and Specialists'* Time Devoted to Projects

Project	1923	1924
Soils.....	2.4	4.7
Farm crops.....	13.9	12.9
Horticulture.....	5.6	6.4
Forestry.....	0.2	0.4
Animal husbandry.....	8.5	8.6
Dairy husbandry.....	5.5	6.7
Poultry husbandry.....	7.9	8.6
Rural engineering.....	2.0	3.3
Rodents and insects.....	1.2	1.6
Agricultural economics.....	4.3	4.0
Foods).....	6.3	(4.4
Nutrition).....		(2.7
Clothing.....	6.4	7.4
Home management).....	2.0	(1.4
House furnishing).....		(1.1
Home health and sanitation.....	0.9	1.4
Community activities.....	3.4	8.1
Miscellaneous.....	29.5	16.3

* Only field work of specialists as reported by county extension agents is included.

Outside of miscellaneous activities which occupied practically one-sixth of the time of extension workers, the lines of subject matter receiving most attention were: Farm crops, 12.9 per cent; animal husbandry, 8.6; poultry, 8.6; community activities, 8.1; clothing, 7.4; dairy, 6.7; and horticulture, 6.4 per cent of the agents' and specialists' time. The corresponding percentages for 1923 are given for comparison. The large decrease in time devoted to miscellaneous activities probably is due largely to more accurate methods of reporting.

Result Demonstrations and Improved Practices Adopted

The total number of adult result demonstrations conducted in 1924 was 645,488 as compared to 721,448 for 1923. The number of projects completed by club members was 489,260 as compared to 428,746 in 1923. (Table 3.)

Table 3. - Adult and Junior Demonstrations Completed and Improved Practices Adopted, 1923 - 1924, as Reported by All County Extension Agents

Item	Adult result demonstrations		Junior result demonstrations*		Better practices adopted

Total.....	721448	645488	428746	489262	5462526	3843781

*Boys' and girls' club members completing.

Nearly four million improved farm and home practices were reported adopted in 1924 or approximately one and one-half million less than during the preceding year. This decrease is due partly at least to elimination of duplicate reporting and to incomplete information from a few States.

The largest increases in number of adult demonstrations conducted in 1924 over 1923 were in soils, forestry, rural engineering, home management, and house furnishings. The biggest decreases were in horticulture, poultry, clothing, home health and sanitation, and miscellaneous.

In junior demonstrations, the chief increases in projects completed in 1924 over 1923 were in potatoes, cotton, and other special crops, dairying, foods and nutrition, home health and sanitation, and miscellaneous. The principal decreases were in horticulture and animal husbandry.

The number of improved practices adopted in 1924 as compared with 1923 was larger in forestry, dairy, rural engineering, rodents and insects, home management and house furnishings, home health and sanitation, and miscellaneous. The largest decreases were in cereals, potatoes, cotton and other special crops, horticulture, agricultural economics, foods and nutrition, and clothing.

4-H Club Work

Nearly 5,500 more boys' and girls' clubs were organized in 1924 than in 1923. The number of different boys and girls enrolled was more than 50,000 greater than in the previous year. (Table 4.) Thirty-four thousand more different boys and girls completed the work outlined in 1924 than in 1923. The number of projects started was greater in 1924 by 220,000 and the number of projects completed greater by 60,000 than in 1923.

Statistical Summary

Table 5 gives a detailed statistical summary of the results of cooperative extension work in 1924. The results as reported by county agricultural agents, county home demonstration agents, and county club agents are listed separately. The number of county extension agents of each kind reporting on the various items is also given for purpose of comparison.
